**Answer:** D

NO.2 The TCP authentication field "Redirect TCP to SSL" is set to "No". What effect does this setting have?

- A. It allows clients and servers to use SSL or TCP/IP to access the Web site.
- B. It allows clients and servers to use TCP/IP and POP3 to access the Web site.
- C. It requires clients and servers to use the SSL protocol to access the Web site.
- D. It requires clients and servers to utilize LDAP to retrieve authentication information.

**Answer:** A

NO.3 Which one of the following describes the function of a Domino Internet Cluster Manager (ICM) server?

- A. It is an input control manager for authentication.
- B. It maintains a list of Domino servers in clusters.
- C. It directs Internet Information Server (IIS) requests to the HTTP server.
- D. It redirects HTTP traffic to the most available server in a Domino cluster.

**Answer:** D

NO.4 Vince has configured an Expired header rule. Which of the following is obtained by using these types of rules?

- A. Explicit instructions to browser and proxy server caches.
- B. It notifies the browser when resources are expected to change.
- C. Explicit instructions to Notes clients on when to update a document.
- D. It notifies the browser when the resource or resources used to generate a response were last changed.

**Answer:** B

NO.5 Lizette wants to enable Domino Off-line Services (DOLS) for her Internet users. What field must be configured to allow DOLS to function?

- A. The DOLS field
- B. The DSAPI field
- C. The ndolextn field
- D. The offline services field

**Answer:** B

NO.6 What type of document controls access to non-database files that users can access via Web browsers?

- A. File protection documents
- B. HTML protection documents
- C. HTTP protection documents
- D. Domino image protection documents

**Answer:** A

NO.7 Miriam, the Domino administrator, has created a Web cluster. However, she wishes the ICM to not allow access without authentication. Which of the following is true in relation to securing the ICM from anonymous access?

- A. The ICM can be configured to accept only SSL requests.
- B. The ICM must have the port for anonymous access disabled.
- C. The ICM must be configured to accept fewer name variations with higher security.
- D. The ICM may only receive and pass anonymous requests and the cluster servers must handle security.

**Answer:** D

NO.8 Which one of the following statements regarding the Certificate Authority (CA) is true?

- A. The CA issues only Internet certificates.
- B. Access to the certifier ID must be granted.
- C. The CA issues both Lotus Notes and Internet certificates.
- D. Access to a certifier ID password must be provided to all registration authorities.

**Answer:** C

NO.9 Carl, a user, performs a domain search against a Domino server from his browser. One of the returned databases resides on a server outside of the search server. What must be configured on the Domino server to present Carl with a correct link to the other server?

- A. The DIIOP field must be enabled.
- B. The second Domino server must have SMTP enabled.
- C. The generating References to this Server field must be configured.
