Exam : **C1000-171**

Title : IBM App Connect Enterprise
V12.0 Developer

Vendor : IBM

Version : DEMO

NO.1 What typically contains reusable helper routines and resources to aid the management and reuse of such resources in App Connect Enterprise?

Response:

- A. Library
- B. Project
- C. Repository
- D. Application

Answer: A

NO.2 What is the primary function of the Connector Development Kit (CDK) in IBM App Connect?

Response:

- A. To import data from legacy systems
- B. To facilitate the creation and deployment of custom connectors
- C. To enhance the security of data transmissions
- D. To provide additional UI components for App Connect Designer

Answer: B

NO.3 How does the global cache in IBM App Connect Enterprise impact message flow performance?

Response:

- A. It decreases performance by adding extra retrieval time.
- B. It increases performance by avoiding repeated data retrieval operations.
- C. It has no impact on performance.
- D. It decreases performance by consuming additional memory resources.

Answer: B

NO.4 Which of the following are benefits of developing user-defined extensions for App Connect Enterprise?

(Choose two)

Response:

- A. Reduced need for external tools and services
- B. Increased dependency on proprietary software
- C. Tailored functionality to meet specific business needs
- D. Enhanced control over data processing and flow

Answer: A,C

NO.5 An Integration Server consumes a large amount of memory on a system. Which diagnostic can help determine where the memory is spent?

Response:

- A. Flow Statistics
- B. Activity Logging
- C. FlowThreadReporter
- D. Resource Statistics

Answer: D

NO.6 Ensuring _____ of messages within a flow is essential to prevent data tampering.

Response:

- A. integrity
- B. brevity
- C. complexity
- D. verbosity

Answer: A

NO.7 What is an essential consideration when migrating to IBM App Connect Enterprise V12.0?

Response:

- A. Reusing existing ESQL code without changes
- B. Assessing compatibility of external Java libraries
- C. Migrating message sets to DFDL
- D. All of the above

Answer: D

NO.8 When initiating troubleshooting for an integration application, what is one of the first steps you should consider?

Response:

- A. Amplifying the logging level for more detailed diagnostics
- B. Rebooting all components without preliminary analysis
- C. Redoing the application's codebase without pinpoint identification of issues
- D. Augmenting the hardware specs immediately to tackle potential bottlenecks

Answer: A

NO.9 How can the default location of BAR files be changed in the App Connect Enterprise Toolkit?

Response:

- A. By modifying the BAR file extension.
- B. By generating the BAR file using custom scripts.
- C. By creating a new integration project for BAR files.
- D. By changing the preferences in the Build BAR settings.

Answer: D

NO.10 Container-based deployments differ from traditional deployments because they:

Response:

- A. Are less scalable
- B. Require more maintenance
- C. Provide a consistent environment across different stages
- D. Do not support distributed architectures

Answer: C
