Valid Certification Exam Dumps Materials and Study Guide -
Lead2Passed

Exam : **C_HANAIMP141**

Title : SAP Certified Application
Associate (Edition 2014) - SAP
HANA

Vendor : SAP

Version : DEMO

NO.1 You want to investigate the runtime of a SELECT statement against an analytic view. Which of the following tools do you use to analyze the model performance, including transferred data?

- A. Plan visualizer
- B. Load graph
- C. SQL Editor
- D. SQL Debugger

Answer: A

NO.2 What is the minimum requirement for a valid analytic view?

- A. One fact table and one attribute view
- B. One attribute view
- C. One fact table and two attribute views
- D. One fact table

Answer: D

NO.3 In a fuzzy search, when would you perform a freestyle search?

- A. When you want to search with a high fuzziness threshold
- B. When you want to search in multiple columns
- C. When you want to search in only one column
- D. When you want to search with a low fuzziness threshold

Answer: B

NO.4 In a graphical calculation view, you specify the default client to be dynamic.

How is the client value determined when the view is used?

- A. By checking the session client of the user accessing the view.
- B. By executing a procedure in the user's own schema.
- C. By applying the filtering conditions on the client field.
- D. By reading the client of the tables in the view.

Answer: A

NO.5 You have created an input parameter in an information model.

In which of the following can you use the input parameter?

- A. The creation of an SAP BEx query reading from the information model
- B. The creation of an SAP BusinessObjects Web Intelligence report directly on the information model
- C. The definition of objects in an SAP BusinessObjects universe
- D. The definition of an information space that reads from the information model

Answer: C

NO.6 Which of the following should you try to implement as best practices for data modeling? Note:

There are 2 correct answers to this question.

- A. Perform aggregation in an attribute view.
- B. Use filters to restrict the number of rows on the tables that make up the analytic views.

- C. Execute calculated columns before any aggregation is performed.
- D. Use a UNION when combining analytic views in a calculation view.

Answer: B,D

NO.7 Which of the following SAP HANA schemas contains the runtime objects of activated views?

- A. _SYS_STATISTICS
- B. _SYS_REPO
- C. _SYS_BI
- D. _SYS_BIC

Answer: D

NO.8 Which of the following can you use to implement currency conversion in an information model?

Note: There are 2 correct answers to this question.

- A. A calculated column in a calculation view
- B. A calculated column in an attribute view
- C. A calculated column in an analytic view
- D. A restricted column in an analytic view

Answer: A,C
