Download a free sample of any of our exam questions and answers

- ✓ Online Test Engine: Online Tool, Convenient, easy to study. Instant Online Access. Supports All Web Browsers.
- ✓ PDF format: Easy to read and print learning materials, our products are available in PDF file format.
- ✓ Desktop Test Engine: Installable Software Application. Simulates Real Exam Environment. Practice Offline Anytime.

Security & Privacy

We respect customer privacy. We use McAfee's security service to provide you with utmost security for your personal information & peace of mind.

Money Back Guarantee

Full refund if you fail the corresponding exam in 60 days after purchasing. And Free get any another product.

365 Days Free Updates

Free update is available within 365 days after your purchase. After 365 days, you will get 50% discounts for updating.

Instant Download

After Payment, our system will send you the products you purchase in mailbox in a minute after payment. If not received within 2 hours, please contact us.

Valid Certification Exam Dumps Materials and Study Guide -
Lead2Passed

Exam : **H31-311-ENU**

Title : HClA-Transmission(Huawei
Certified ICT Associate-
Transmission)

Vendor : Huawei

Version : DEMO

NO.1 Which of the following statements about the signal label byte C2 is incorrect?

- A. If the C2 byte mismatch is detected, an LP_SLM alarm is reported in the corresponding VC-4 channel.
- B. C2=00H indicates that the VC-4 is unequipped.
- C. The C2 byte is used to indicate the multiplexing structure of the VC frames and the payload property.
- D. The C2 byte to be sent must match the C2 byte to be received.

Answer: A

NO.2 When severely errored seconds (SESS) are present in the PM section at the ODUk layer, which of the following alarms is reported on the NMS?

- A. ODUk_PM_SESR
- B. ODUk_PM_UAS
- C. ODUk_PM_ES
- D. ODUk_PM_SES

Answer: D

NO.3 A two-fiber ring topology consisting of three NEs is arranged in the counterclockwise sequence as A, B, and C.

Services between A and C occupy the 48th VC-12 timeslot in the first VC-4 on the short path, and services between B and C also occupy the 48th VC-12 timeslot in the first VC-4 on the short path. In this case, which of the following is the subnet type of the ring protection?

- A. Unidirectional path protection ring
- B. All of the above
- C. Bidirectional MSP ring
- D. SNCP ring

Answer: C

NO.4 An optical amplifier unit compensates for line loss and extends transmission distance.

Connecting multiple optical amplifier units in cascading mode can infinitely extend transmission distance of a system.

- A. FALSE
- B. TRUE

Answer: A

NO.5 Some of the SNCP protection switching conditions are default, such as AU-AIS and TU-AIS.

Others conditions are optional, such as HP-TIM and HP-SLM. The optional conditions can be flexibly set based on service levels.

- A. FALSE
- B. TRUE

Answer: B

NO.6 The Erbium Doped Fiber Amplifier (EDFA) is a key component of the new-generation optical communication system.

Which of the following are the features of the EDFA? (Multiple Choice)

- A. High output power
- B. Low noise index
- C. Amplification of any wavelengths
- D. High gain

Answer: A,B,D

NO.7 PDM uses the polarization beam splitter to divide the laser into two perpendicular directions: x and y.

- A. TRUE
- B. FALSE

Answer: A

NO.8 Which of the following methods can be used to multiplex lower-order ODUk to higher-order ODUk?

- A. Time division multiplexing
- B. Wavelength division multiplexing
- C. Space division multiplexing
- D. Frequency division multiplexing

Answer: A

NO.9 The fiber core refractive index n_1 must be $>$ the cladding layer refractive index n_2 , which is a necessary condition for transmitting optical signals in optical fibers.

- A. lower than
- B. higher than
- C. equal to

Answer: B

NO.10 Which of the following can be configured as the monitoring time of NE performance events?

- A. Earlier than the current time
- B. Any time
- C. Same as the current time of the NE
- D. Later than the current time

Answer: D

NO.11 When multiple users need to share the same VCTRUNK and use the same VLAN ID, the QinQ technology can be used.

- A. FALSE
- B. TRUE

Answer: B

NO.12 The SNCP switching speed can be improved if you classify the SNCP services that have the same source, sink, or route into groups.

A. FALSE

B. TRUE

Answer: B

NO.13 SES: There are 5% or more than 5% bit error blocks or at least one defect (OCI/AIS/LCK/IAE/LTC/TIM/PLM) within one second.

A. TRUE

B. FALSE

Answer: B

NO.14 EPL services exclusively use ports and band widths, and different users may need to share resources.

Which of the following methods can be used to isolate user data?

A. QinQ technology

B. All of the above

C. VLAN ID

D. MPLS label

Answer: B

NO.15 During service configuration, there are two timeslot modes. Huawei uses the interleaved timeslot mode by default.

A. TRUE

B. FALSE

Answer: B
